\(^5\) Minnesota Land Economics

Prepared by Anwar Ahmed, Obsa Bokku, Gwendorlene Chea, Austin Lossing, Jessica Orth, Reid Ronnander, Ben Schuldt May 2012.
Wind and water erosion tables reflect the number of acres with the above listed tonnage of erosion per acre.
Crop production index display the number of acres that fall within the above listed crop growing potential; the higher the growing potential, the better that land is for farming.
Aspen production index display the number of acres that fall within the above listed aspen growing potential; the higher the growing potential, the better that land is for growing aspen trees or forests.
